Date: July 06, 2024

Salam Bilal,

Here are my comments on the CaExp website:

I will begin with the Home page:

1. When you are in the split-screen view, please make some sort of (very short) "transition" when the menu item appears and disappears; i.e. when it opens and closes
   By the way, when I say "split-screen view", I mean when you open two apps on your PC screen next to each other; i.e. MS Word and web browser. Here is a screenshot example: https://gyazo.com/5b73221c3feb184a932c4c585243a46c
   This represents the tablet view
   Q: How long should the "transition take"?
   A: Only a part of the second. Look how the burger becomes an " X " and vice versa. The same time length good enough

2. When I browsing the pages of the website in full screen (desktop view), the menu items on top disappear: https://gyazo.com/5d234fcfcadceec4c7c47feb40831236
   - Update: now, they are there. So, sometimes they are there, and sometimes they are not!!!

3. How hard is it to add the banner ads to the Home page? I mean one, two, or all three of them?

4. When we add the multilanguage, I do not like the floating button that appears at the bottom right side. Can you make it as either a button that says the word "Language", or a small flag of the country of the current language?
   If you go for the button with the word "Language", then please make sure the word "Language" changes following the language in which the website is being browsed. So, if we are browsing the website in French, then the word must become "Langue", and when we are browsing in Urdu, then the word must become: زبان
   And so on

5. The top menu bar: when we scroll down, this menu becomes "smaller". And then when we scroll back up, it gets back to its original size, and this is all good. Here is the thing: currently, it does that (becomes smaller and then larger) by some sort of "jumping". Can we let it do that (let it change size) in a "smooth, neat, and gradual" manner? Like the "Morph" effect that appears in PowerPoint?
   To show you an example, I made this effect and uploaded it on YouTube: https://www.youtube.com/watch?v=4enA6-3BCC0

6. This point is only a question for now. Based on your answer, we will decide what to do with it: Regarding the "Log in" and "Register" buttons on top: why are they in different colors? Why don't we make them the same color? Maybe, we should make them both white with a blue frame (like the "Register" button). Just make the frame a little bit thicker
   By the way, I see this everywhere (where one of the buttons is blue, and the other one is white). Is there a reason for this?

7. Regarding "Our sponsors": Instead of showing four "small" ads, with a small photo for each one of them, can we show only two, with larger ad and larger photo, and then we put these arrows on the left and right?
   https://gyazo.com/64c6a2bb59d2955e5698ca8e5ae92f0c

- Moreover, if you put these arrows, can the number of the Sponsors be actually more than just two, and make them "move" to the left or to the right automatically (i.e. on their own), even when the user is not clicking on these arrows?
  If yes, please let them move every 3, or 4, or 5 seconds. Or, can you recommend a number of seconds?

8. Regarding the "Featured exporters": there are only six of them on the Home page. Here is my question:
   - Can we have more than six, and then make any six of them appear randomly on the Home page? Then, they will changing automatically (on their own) while the visitor is browning the website
   - If yes, can I select any one (or more) of them that I want to appear on the Home page, and then the rest will appear randomly? Let me explain this point: let us imagine that we have 20 Featured exporters". Can I say: "I want THIS one (ot THESE two) of them to appear on the Home page". So, it appears, and the remaining five appear randomly. Is this possible?
   - Or, does it have to be six and only six of them?
   - And, can we put these arrows to the left and right so more of them can be on the Home page: https://gyazo.com/64c6a2bb59d2955e5698ca8e5ae92f0c
   - If yes, please move them every 3 or 4 or 5 seconds (whatever length you recommend)

9. The distance between the title "We value our sponsors" and the ads under it is too large; please reduce it to around 0.7cm only. For guidance, look at the distance between the title "Inquiries to buy" and the ads under it. That one is good; it is exactly 0.7cm
   - The same comment applies to ALL the titles on the Home page: "Business categories", "We value our sponsors", "Featured exporters", "Trade shows & events", "Canadian Exports Magazine". Please fix them all; make the distance = 0.7cm

10. "Trade shows & events": we need the dates of the event to be there as well. Here is my suggestion: you can write the name of the event in the middle of the first line, and then put the city and country on the left half of the second line, and write the dates "From … to …") to the right of the same line. If this makes the line too crowded, please add a new line that says "From" and "To". Remember to follow the same format in writing the dates
    - Important: DO NOT write the words "From" and "to": just write the beginning and end dates with a dash (hyphen) between them; like this: July 07, 2024 - July 15, 2024

11. "Inquiries to buy" (I2B): Each I2B needs to show FIVE pieces of information; the Title of the I2B (the "Description"), the "Category" (which is the Business category"), the "Country", the "Deadline" and the "Estimated value". And then, the button "More details". Currently, it only shows two pieces of information
    - Note: if this is intentional from you (that you show only two pieces of information), then let me know. Example; if you do not want the page to appear too crowded

<u>Now, I will comment on the admin</u>:
25.   The "Forgot your password" on the admin login page (this one:
         https://xelenthost.com/login) has two issues:
       25.1.   The logo on top is broken:
                https://gyazo.com/a51e4c2b14365c6bcfb4b721e64e9737
       25.2.   The title must say "Forgot" and not "Forget"
26.   I tried to edit this text (https://gyazo.com/543ed472725c21ee0dc04008266ef0f8), but
         was not allowed. I got this message:
